Position support slats (mm)		From side pallet to side support slat			
Slat		145			
		Distance between the two support slats			
		770			
Tolerance on position of all slats		-3/+3		-3/+3	

General specifications

Type of wood = softwood/hardwood

No losing, no splitted, no curved and no dirty slats or blocks.

Nails fully fitted in the wooden slats (sunken).

Blocks parallel positioned towards the upper slats.

Pallets dry delivered = pallets must not be wet.

Apply HT stamps on the block at the middle of the long side, both on the front- and backside of the pallet.
